

Surajit Dutta

Product Designer (UX / UI / Product Design)

Pune, India • surajit3255@gmail.com • +91 7001064616 • linkedin.com/in/surajit3255 • [Portfolio URL]

SUMMARY

Product Designer with 3+ years shipping enterprise SaaS for identity, security, and admin platforms. Specializes in 0-to-1 product design, scalable design systems, and AI-augmented design workflows that compress discovery-to-handoff cycles from weeks to days. Currently leading end-to-end design at miniOrange across IAM, PAM, IGA, and UEM products — balancing usability, performance, and compliance for high-trust IT and security teams.

EXPERIENCE

Product Designer — miniOrange, Pune, India

Jul 2024 – Present

- Lead end-to-end product design for **enterprise identity and security platforms** (Active Directory, PAM, IGA, UEM), delivering scalable admin experiences for IT and security teams in compliance-driven environments.
- Designed and shipped a **production-level, cross-functional Active Directory prototype in 5 business days** by orchestrating Figma Make AI to rapidly generate, iterate, and refine functional UI flows ready for engineering handoff — compressing a typical 3-week design cycle by ~70%.
- Built and maintain a **scalable design system** using atomic components, variants, and Figma variables across multiple enterprise products — standardizing UI patterns and improving design + dev velocity across teams.
- Drive **0-to-1 product discovery** through stakeholder interviews, competitive research, and translation of insights into clear product flows, interaction models, and high-fidelity designs aligned with business and technical constraints.
- Operationalize **AI-augmented design workflows** — using Claude, Figma AI, and prompt-driven exploration for rapid ideation, microcopy, edge-case enumeration, and design QA — reducing repetitive work and freeing time for higher-leverage decisions.
- Partner with engineering and product managers on **early feasibility alignment and design QA**, ensuring high-quality releases without late-stage rework.

UX/UI Designer — Impero IT, India

Jun 2023 – Jul 2024

- Designed digital products across multiple domains including **mobile apps for food delivery, healthcare, and events**, plus web platforms for social media and admin dashboards — covering full lifecycle from research and IA through high-fidelity UI.
- Collaborated with development, QA, and management teams to align project goals with engineering constraints, managing time and prioritization to deliver consistently high-quality releases.
- Standardized component libraries and interaction patterns across projects, reducing rework and improving handoff clarity for engineering teams.

UX/UI Designer — Fortmindz, Kolkata, India

Jul 2022 – May 2023

- Redesigned websites and applications to lift user engagement and reduce bounce rates; optimized e-commerce checkout flows and product pages to drive higher conversions.
- Partnered with developers to ship user-friendly interfaces and streamline workflows for on-time project delivery.

SKILLS

Product Design & 0-to-1: User research, problem framing, stakeholder discovery, IA, wireframing, prototyping, usability testing, interaction design, MVP scoping, design-led product definition

Design Systems: Atomic components, variants, Figma variables, design tokens, pattern libraries, cross-product standardization

AI-Augmented Workflows: Figma Make AI, Claude, ChatGPT, Cursor, prompt-driven design exploration, AI-assisted prototyping, edge-case enumeration, microcopy, design QA

Domains: Enterprise SaaS, Identity & Access Management (IAM), PAM, IGA, UEM, Cybersecurity, Admin platforms, Mobile (B2C)

Tools: Figma, FigJam, Figma Make AI, Notion, Jira, basic HTML/CSS, video editing

EDUCATION

B.Tech, Information Technology — Netaji Subhash Engineering College 2019 – 2022 • CGPA 8.8 / 10

Diploma, Electronics & Telecommunications Engineering — Purulia Polytechnic 2016 – 2018 • CGPA 7.2 / 10
